Title: General Advising

Author: Tim Mahan

As an advisor, I want to be able to quickly search, update, and add students and student information to the database. I want to be able to track their progress through the lower and upper division, as well as keep up with compliance for upper division students. I'd also like to be able to send out emails to students with templates in the SONAR system, this way I don't have to spend time typing out email addresses, or copying them from another source. I'd also like to be able to look at reports that show me students who are out of compliance, have not re-enrolled, and students who failed a class. I should also be able to export these reports to my machine for viewing.

Title: Student Compliance

Author: Ajay Singh

As a nursing student, I want to be able to quickly gather data such as grades, compliance status etc. about me whenever needed. I want to be able to submit documents and set up advising appointments online and would like to be notified when my graduation could be delayed or enrollment is in jeopardy due to grades, payments, and/or other compliance issues so I can go ahead and get them corrected. The notifications should have information on what kind of risks I am facing instead of a general error. I want to be able to submit scholarships online and receive notification about their status.

Title: Scholarship submission

Author: Rebecca Ludwig

As a student applying for a scholarship, I want to be able to apply for scholarships online and receive updates on the statuses of my scholarships. So that I can electronically submit scholarship forms and required documents and receive emails indicating the status of my submission. When I apply for a scholarship, I should be able to fill out required information on an online form. When I submit required scholarship reports (FASFA, SAR, ect.), I should be able to do so by electronically uploading the document. When I submit the scholarship, I should receive an email indicating my submission was received. When my scholarship is accepted or declined, I should receive an email alerting me. If any further action for my scholarship needs to be taken, I should be sent an alert via email.

Title:

As a prospective student I would like to be able to fill out an online form that will have the university get in touch with me. I would like for the school to be able to forward me information and reminders about when deadlines are, and other vital information that would make getting into the school easier. I would also as a prospective student like easy to find links for how to apply for financial aid and scholarships. Dealing with money as a potential new student is always a hassle and can be intimidating, so an easy to use web browser that simplifies the process would make the process better.
